

Assignment 2: Building a Chatbot UI with Gradio

Objective:

Create a user-friendly chatbot UI using Gradio. This initial part focuses on designing and deploying a basic chatbot interface capable of handling user interactions.

Deliverable:

- Gradio Web Interface Link: Share a direct URL to your Gradio web interface, showcasing the chatbot's capability to conduct basic conversations. This interface should be publicly accessible.

Submission Guidelines:

- The chatbot should be fully operational and interactively demonstrate the conversation flow you've designed.
- Include a short document (PDF format) with your submission that describes the functionality of your chatbot, highlights any unique features of your Gradio interface, and provides instructions on how to interact with the chatbot.

This assignment encourages exploring Gradio's potential for creating interactive web applications and gaining experience with deploying projects on Hugging Face Spaces, a platform for sharing machine learning models and apps.
