Assignment 3 : Building a Multi-Tenant Bubble App

Task

Develop a multi-tenant Bubble app with the following functionalities:

- **Login/Signup Flow**: Implement user authentication allowing users to log in or sign up.

- **Simple Chat Functionality**: Create a basic chat feature for users to communicate.

- **User Roles**: Set up two user roles - Admin and Regular. Users can choose their role during the signup process.

  - **Regular Users**: Have limited access to conversations.

  - **Admin Users**: Have complete access to all conversations.

Deliverable

- Submit the link to your Bubble app with these functionalities implemented.

Evaluation Criteria

- **Authentication**: Properly functioning login/signup flow.

- **Chat Feature**: Working chat functionality with message sending and receiving.

- **Role Management**: Correct implementation of user roles with appropriate access controls.
